

Daily Resettable Order Number

Added to the POS in version 19.6.16 was the ability to have a resettable order number that can be printed on the guest receipt or the kitchen ticket

In the layout text file for the guest receipt (PixelReceiptLayout.txt) or the kitchen ticket (Network Printer, custom chit) add the variable &RstOrderNum

```
PixelReceiptLayout.txt - Notepad
File Edit Format View Help
&format_datetime=mm/dd/yyyy hh:nn:ss AM/PM
&format_numtoword=North America
&format_weightunit=kg
&format_weightitem=&weight_quantity &weight_unit @ &weight_cost/&weight_unit
&format_seatline=^W &item_descr
&format_consitemoption=^M^R&consitem_quantity &consitem_descr &consitem_cost
&format_tax1indicators=[S],[Z]

&header
^CTable &table_num
^L
^CTrans#: &RstOrderNum | Serv: &who_started
^C&date_time #Cust:&num_cust
^I
```

Network Printers

Network Printers

Kitchen

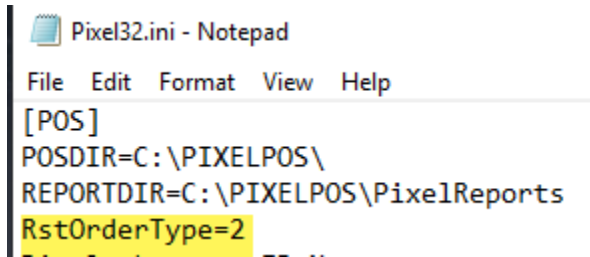

General Print Filter Sort Order **Custom Chit**

☒ Use Custom Chit

```
&format_LegacyV12=N
&format_datetime=mm/dd/yyyy hh:nn:ss AM/PM
&format_numtoword=North America
^L
&skip_empty^C^W^R&preview_order
&skip_empty^W^R^C&sale_type
^C^W&printer_name
^C^W&table_label
^W^C&who_started
^CTrans#: &RstOrderNum Rev Center: &rev_center
^Order Time:&date_time #Cust:&num_cust
```

To activate this feature, add to the Pixel32.ini Under the [POS] section the following line

RstOrdType=2

```
Pixel32.ini - Notepad
File Edit Format View Help
[POS]
POSDIR=C:\PIXELPOS\
REPORTDIR=C:\PIXELPOS\PixelReports
RstOrderType=2
```

Save your changes and then restart PixelPoint for this to take effect

Note:

RstOrderType=#

Where # can be

0= disabled

1= yearly resettable number (default) starts at 1 on January 1st of each year

2= Daily resettable number starts at 1 each new open date (not calendar date)
