Coupon/Promo Summary Report

The Coupon/Promo Summary report shows an itemized list of all coupons and promotional discounts redeemed within the date range selected by the user. The report is organized into sections for each separate coupon or discount that was applied in the given date range of the report. Individual discounts on transactions are displayed, with totals of the discounts given for each individual coupon or promotion being tallied at the bottom of each section.

Data is displayed for the following categories:

- **Coupon** – The name/description of the coupon, discount or promo being applied.
- **Trans #** - Displays the transaction number on which each individual discount was applied.
- **Items** – The name of the item for which a discount was applied.
- **Quantity** – The quantity of an individual item for which discounts were applied to for that transaction.
- **Discount** – The total value of the discount applied for each item (discount multiplied by the quantity of each discounted item).
- **Total** – The total value of the discount applied for each item, with an overall total shown at the bottom of each section. The total at the bottom of each section shows the total value of all discounts applied for each coupon/promotion.
- **Authorized By** – The name of the employee who authorized the discount.
