

Seven Day Labor Summary Report

The Seven Day Labour Summary Report shows a variety of operational information for the date selected as well as the six days previous (giving a full 7 days of data). The report also shows the same operational information for the week previous to the selected week, for comparison. Total values are displayed in the far-right column of the report.

The report displays data for the following categories based on the selected date range:

Sales – Shows the total (net) value of sales.

Guest Count – Shows the total number of guests served.

Trans Count – Shows the total number of transactions performed.

Table Count – Shows the total number of tables served.

Labor Hours – The total number of hours worked, combined for all employees.

Labor Wages – The total amount of money paid out to employees (multiplies Labour Hours by the hourly wage for all on-shift employees).

Labor Cost – Shows Labor Wages as a percentage when compared against the total value of Sales.

+/- - This row, included for each separate category of data in the report, shows the difference between the selected week being reported on versus the week previous to the selected week.
